San Juan: Program Enrollment and Articulation: from Two-year Institutions to Four-year Institutions

From 2013 to 2016, there was a 9.2% decrease in enrollment in foreign languages classes among U.S. colleges and universities (Looney & Lusin, 2018). Foreign language program articulation between higher education institutions becomes one of the possible solutions to the growing problem of declining enrollment. This panel will present how a current senior college established an articulation program with neighboring community colleges to reduce the challenges for students transferring from community colleges to senior colleges. Program goals and design, outreach and recruitment, curriculum and instruction, advising, and effectiveness will be shared and discussed.

Crystal B: Social, Cultural, and Interactional Dimensions of Chinese Language Teaching and Learning (II)
While most Chinese language teaching professionals have tended to focus much of the effort on the mechanisms and pedagogical aspects of acquiring Chinese as a second language, there are critical issues in the social, cultural, and interaction dimensions of the enterprise that must be raised in our consciousness as they can play important roles in the long term development of the field. This panel contains a total of six papers that begin to address some of the issues in a concerted way. This is the second part of the panel, consisting of three papers that highlight language-internal factors.

Crystal C: Technology-Assisted Instruction, Interaction and Reflection in Chinese Language Courses
Technology provides diverse assistances for language teaching and learning both in and outside of classroom. Based on cases of applying technologies to language teaching and learning in different contexts, the three presentations of this panel illustrate that the use of technology facilitates the incorporation of authentic course materials, raises intercultural understanding within task-based instruction, mobilizes meaningful communication in three modes during in-class activities, and promotes learners’ reflective thinking along the learning process. These reinforcements brought by technology enables a more integrated proficiency development among Chinese language learners.

Mercer A: Teaching Chinese as a Heritage Language in the U.S.: From Data to Practice
This panel reports on the results of a two-step national survey on college-level Chinese as a heritage language (CHL) education in the U.S. The initial survey identified 51 institutions offering a separate heritage track for Chinese. The follow-up elicited CHL instructors’ views on existing teaching materials, challenges, successful experiences, needs for teacher training, and pedagogical suggestions. In addition to providing a general picture of college-level CHL education across the U.S., this paper also identifies urgent issues that need to be addressed for CHL education and discusses implications for teaching Chinese to heritage language learners.

**Crystal C: Research to Practice: Developing Reading Literacy among CFL Learners**

This panel provides an overview of instruction in the reading and comprehension of written Chinese texts, focusing on different stages in the reading process: character and word-level reading, sentence and paragraph level reading, and text-level reading for literal and inferential comprehension. The presentation includes classroom activities grounded in research findings targeting the reading skills that we discuss, demonstrating the use of these activities with students at various proficiency levels. It argues for the need to reinforce lower-level reading skills among more advanced students and to begin developing higher-level reading skills at the elementary level of instruction.

**Orcas: Advancing to Advanced Chinese: From Speaking to Writing to Critical Thinking**

Students of Chinese at post-intermediate level commonly hit a learning plateau. This panel addresses the challenges in helping them move to more advanced levels. The first presenter describes a seven-step strategy to raise students’ level of oral skills from daily conversational Chinese to more formal, academic-style Chinese. The second presenter introduces a new approach to teaching Classical Chinese that stimulates students’ interest in formal expressions in both speaking and writing. The third presenter demonstrates how minifictions can be effectively used in a fourth year Chinese class to help students to acquire idiomatic expressions while fostering their critical thinking.
Mercer A: Development and Improvement of the Ability to Teaching Chinese Language: Grammar, Phonetics, Applications of Technologies

本专题将从语法、语音和科技应用三个方面讨论如何培养及提升汉语作为第二语言教师的教学能力。报告将分析、比较新手和有经验教师对语法点难度的评估、理解与诠释；将透过教学录像和教师访谈说明语音教学的缺失及改善方法；也将基于合作教学的理念，分享如何运用虚拟平台创造、扩大教学的互动空间，有效建立师生学习共同体。

Mercer A: Incorporating Communities in the CFL Classroom: Multiple Approaches and Case Studies
Drawing on classroom practices of three CFL programs in Canada and the US, this panel describes a diverse range of classroom projects that incorporate local communities in the FL curriculum. We describe projects designed for different proficiency levels, learning outcomes, and to utilize specific characteristics of local communities. By reflecting on the design and implementation of concrete projects, we provide practical and theoretical insights into new and different ways to incorporate community-based learning in the CFL classroom.
